

# Fundraising hints and tips

Here are some ideas on how you can raise money to support our NHS whilst keeping safe and respecting the really important rules of social distancing.

## Host a quiz or contest with your neighbours

Hold a virtual pub quiz or contest for all of your neighbours and ask for each person to donate £2 to take part. You could even source some prizes for the winners! You could theme your questions on your local area.

## Get crafty!

You can make items at home to sell, whether that's jams and chutneys, or something made from household items, you can let your imagination run riot!

## Cake sale

Buy some cakes from your local supermarket and ask for donations for each cake from your neighbours. Remember to stay socially distant whilst doing this, you can keep the cakes in their original boxes to stay safe.

## Socially distant talent show

Find out which of your neighbours has the X-Factor! Encourage your friends and neighbours on the street to show off their best or most unusual talent. Anyone who takes part can make a donation to enter an you can organise prizes for the best (and worst) talent!

## Party with a twist

Encourage your neighbours to dress up for your Stay at Home Street Party! People can either wear the kinds of clothes that they'd wear for an evening out, or you can wear fancy dress in a theme of your choice. Encourage everyone to make a donation in support of our NHS, people could donate the amount of money that they would normally spend on an evening out.

## Promote your event

Make sure to let your friends and neighbours know that you are hosting a Stay at Home Street Party, go live on social media and encourage your friends to join you by video call! You can set up a JustGiving page at [justgiving.com/uhbcharity](https://www.justgiving.com/uhbcharity) and send the link around to help boost the amount of money that you raise.
